Securys®

Privacy and cyber security

Delivering properly managed prevention, detection and remediation, including breach and crisis management.

Does your organisation treat privacy and cybersecurity as separate silos? Do you find yourself in meetings where two sides are divided by a common language?

Securys, the global privacy consultancy, is here to bring the two camps together. Wouldn't you prefer to work with a consultancy that has privacy professionals and technologists focused on delivering practical and workable solutions, not dry legal advice?

We all know that technology is not a panacea but it's a critical part of ensuring the safe stewardship of data. We work to unify information security and privacy functions deliver properly managed prevention, detection and remediation including breach and crisis management.

# Securys®

Privacy Made Practical®

Bridging the gap

If you have a legal team making recommendations that you cannot deliver with your existing infrastructure or a Privacy Office that doesn't understand what you already have in place, why not speak to a consultancy that can act as a bridge and implement technology and policy solutions that work together.

Processes, toolsets and reporting

Privacy is a continuous lifecycle, not a one-time fix. We've developed and refined effective processes, toolsets and reporting to handle not only legacy audit and remediation, but also privacy and security by design. We have proven experience of integrating our privacy advisory service into global innovation and evolution to ensure that privacy implications are considered at each stage of any change project from conception through scoping and design to procurement, implementation and delivery.

Embed privacy in your change management programme

Privacy education → Innovation / Evolution

Personal data involved? — Yes →

Initial privacy discussion

Privacy advisory → Specification Procurement Design Budgeting

Formal privacy review — Fail → (back to Specification Procurement Design Budgeting)

Pass →

Privacy advisory → Development Implementation Testing Training

Privacy validation — Fail → (back to Development Implementation Testing Training)

Production — Fail →

Privacy Audit

Privacy by design

- Avoid late-stage redesign
- Bake compliance in early
- Make sure processing benefits the data subject
- Balance data consumption and commercialization — don't use the asset so much that you diminish its value

Privacy transformation

Since data is such a cross-functional asset that's collected, used, enhanced and analysed by a multitude of teams throughout your organisation, implementing a cross-functional target operating model that embeds trust and data protection across multiple touchpoints within the organisation is fundamental to ensuring transformation efforts thrive.

Securys can support and define a data vision in which appropriate data use and protection is at the heart of data strategy and closely aligned to your business objectives.

To have Securys benchmark your breach and incident management processes, run a vendor management programme or to simply have an introductory chat to see how we can help with your privacy transformation, please email us on info@securys.co.uk.
We have **proven experience of integrating** our privacy advisory service into global innovation and evolution.

About Securys

Securys is a specialist data privacy consultancy with a difference. We're not a law firm, but we employ lawyers. We're not a cybersecurity business but our staff qualifications include CISSP and CISA. We're not selling a one-size-fits-all tech product, but we've built proprietary tools and techniques that work with the class-leading GRC products to simplify and streamline the hardest tasks in assuring privacy.

We're corporate members of the IAPP, and all our staff are required to obtain one or more IAPP certifications. We are ISO 27001 and ISO 27701 certified with a comprehensive set of policies and frameworks to help our clients achieve and maintain certification.

Above all, our relentless focus is on practical operational delivery of effective data privacy for all your stakeholders.

We're not just a consultancy. **We're your privacy engine room**. We can stand in your boardroom and do strategy with the best of them, and work with your compliance teams to solve knotty problems. We can audit your compliance and deliver drillable risk dashboards across the organisation. But above all we can get involved at ground level and help your frontline teams get the job done. That's Privacy Made Practical®.
